ANTIQUE MARBLE - IGIENE E PULIZIA

PULIZIA DURANTE LA POSA.

Nel caso si utilizzi stucco cementizio per riempire le fughe, rimuoverne i residui prima che si induriscano completamente. Nel caso in cui restino ancora tracce di sporco, ricorrere a un detergente a base acida tra quelli disponibili sul mercato. Non utilizzare mai acidi puri o detergenti acidi troppo aggressivi, perché rischiano di intaccare il sigillante delle fughe.

PULIZIA ORDINARIA.

Per una pulizia generale, spazzare il pavimento o passare l'aspirapolvere per rimuovere sporco o altri residui. In seguito, lavare il pavimento con uno straccio inumidito da una soluzione a base di acqua calda e un detergente multiuso. Non utilizzare per la pulizia sostanze acide o basiche ad alta concentrazione, ma ricorrere sempre a soluzioni diluite. Le procedure di pulizia qui descritte sono adatte anche per rivestimenti e pezzi speciali.

CLEANING DURING LAYING.

If cement grouts are used, remove all residues before completely set. If some traces of dirt are still left, use an acid detergent of the kind available on the market. Never use pure acids or over-strong acid detergents because they may damage the grout.

ROUTINE CLEANING.

For general cleaning, brush the floor or use a vacuum cleaner to remove dirt or other residues. Afterwards, wash the floor with a cloth wet with a solution of a multipurpose detergent in hot water. Never clean with highly concentrated acids or bases; always use diluted solutions. The cleaning procedures described above also apply for wall tiles and trims.

NETTOYAGE PENDANT LA POSE.

Si l'on utilise du mortier-colle pour remplir les joints, enlever les résidus avant leur durcissement. S'il reste encore des traces de saleté, nettoyer avec un nettoyeur à base acide que vous choisirez parmi ceux disponibles sur le marché. Ne jamais utiliser d'acides purs ou de détergents acides trop agressifs, car ils risquent d'attaquer le produit de jointoiement.

NETTOYAGE ORDINAIRE.

Pour un nettoyage général, balayer le carrelage ou passer l'aspirateur afin d'enlever la saleté ou d'autres résidus. Puis, laver le carrelage avec une serpillière trempée dans de l'eau chaude additionnée d'un détergent multi-usage. Ne pas utiliser de substances acides ou basiques à forte concentration, mais toujours des solutions diluées. Les procédures de nettoyage décrites ci-après sont également adaptées pour les revêtements et les carreaux spéciaux.

REINIGUNG WÄHREND DES VERLEGENS.

Falls zur Verfügung eine zementhaltige Fugenmasse verwendet wird, müssen die Rückstände entfernt werden, bevor sie vollständig härten. Falls noch Schmutzspuren zurückbleiben, einen handelsüblichen Reiniger auf Säurebasis verwenden. Nie unverdünnte Säuren oder zu aggressive einiger benutzen, da sie die Fugenmasse angreifen können.

NORMALE REINIGUNG.

Für eine normale Bodenreinigung den Schmutz oder sonstige Verunreinigungen mit einem Besen oder Staubsauger entfernen. Dann den Boden mit einem Lappen und einer Lösung aus heißem Wasser und Mehrzweckreiniger wischen. Keine hochkonzentrierten säure-oder laugenhaltige Reinigungsmittel, sondern immer verdünnte Lösungen verwenden. Die hier beschriebenen Reinigungsvorgänge eignen sich auch für Wandfliesen und Formteile.

LIMPIEZA DURANTE LA COLOCACIÓN.

Si se ha usado masillado de cemento para llenar las juntas, quitar los residuos antes de que se endurezcan completamente. En caso de que sigan quedando restos de suciedad, recurrir a un detergente de base ácida de los que existen en el mercado. No utilizar nunca ácidos puros ni detergentes ácidos demasiado agresivos, pues podrían corroer el sellador de las juntas.

LIMPIEZA ORDINARIA.

Para una limpieza general, barrer el suelo o pasar la aspiradora con el fin de eliminar la suciedad u otros residuos, después limpiar con un trapo ligeramente humedecido con una solución a base de agua caliente y un detergente multiuso. Para la limpieza, no utilizar sustancias ácidas ni básicas muy concentradas: emplear siempre soluciones diluidas. Los métodos de limpieza que se acaban de describir valen también para la limpieza de los revestimientos y las piezas especiales.

ЧИСТКА ВО ВРЕМЯ УКЛАДКИ.

Если используется цементный раствор для заполнения швов, удалите его остатки до полного отвердевания. Если останутся следы загрязнения, используйте имеющееся в продаже моющее средство на кислотной основе. Ни в коем случае не используйте кислоты в чистом виде или слишком агрессивные моющие средства на кислотной основе, потому что они могут повредить швы.

ОБЫЧНАЯ ЧИСТКА.

Для общей уборки подметите по линолеуму пылесосом для удаления грязи и других остатков. После этого вымойте пол тряпкой, смоченной раствором из теплой воды и универсального моющего средства. Ни в коем случае не пользуйтесь для чистки высококонцентрированными кислотными или щелочными веществами, всегда используйте разбавленные растворы. Описанные выше процедуры чистки пригодны также для облицовочной плитки и специальных изделий.
