01.

Un'intensa emozione
naturale.

An intense natural
emotion.

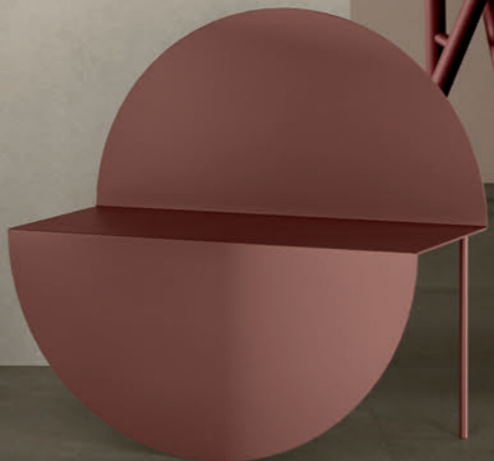

Introduction.

Intense is a ceramic surface that pays homage to limestone, rich in clastic granules and micro-inclusions of fossils, but adding its own distinctive touch, an expression of the ongoing dialogue between craftsmanship and technology. The collection is, therefore, a reflection of the company's style, bringing a recognisable visual identity to both indoor and outdoor spaces.

The collection's five colour options offer a range of neutral, warm, and enveloping tones, designed to complement one another or be paired with other collections, making it possible to create balanced and aesthetically pleasing environments.

A wide range of formats, surface variations, and decorations offer endless possibilities for customisation. From uniform layouts to more dynamic and graphic arrangements, Intense is a complete and versatile collection that meets every designer and architectural need.

ELEGANZA NATURALE

Ispirata alla roccia sedimentaria calcarea, la collezione Intense riproduce nel modo più fedele le granulosità clastiche e le micro-inclusioni fossili tipiche di questa pietra restituendo un'autentica emozione naturale.

CINQUE CROMIE CALDE

La palette cromatica si compone di cinque colori nativi del soggetto calcareo. Tonalità neutre ed avvolgenti che richiamano il carattere della pietra naturale dalla matrice intensa e calda, per trasmettere in ogni ambiente una sensazione di comfort e tepore.

SENSAZIONE MATERICA

Ogni aspetto di Intense è curato per essere totalmente realistico. La sincronia di grafica e struttura riflette l'evoluzione della superficie allo scorrere del tempo, rivelando nelle cavità della texture l'essenza di un effetto pietra dalla bellezza armoniosa e dalla profondità materica.

QUATTRO SUPERFICI

Un variegato set di finiture riproduce lavorazioni della pietra adatte ad ogni impiego. L'effetto limestone di Intense risulta opaco e profondo nella versione Nat, morbido e vissuto in Lapp, scapellato e decorativo declinato nella variante Trait e perfetto per l'outdoor con Grip.

NUOVO FORMATO

La collezione si distingue per l'ampiezza della sua gamma di formati, tra cui spicca l'introduzione del nuovo modulo di 90x180cm in spessore di 9mm. Questa novità offre nuove possibilità di composizioni e di posa, garantendo superfici sempre più uniformi e architettoniche.

OUTDOOR SENZA LIMITI

Con la finitura Grip antiscivolo disponibile nella più ampia varietà di formati di sempre, Intense consente superfici per spazi esterni in perfetta continuità con lo stile degli interni. La proposta è completata dal formato L2 in 20mm di spessore per gli impieghi più esigenti.

DECORAZIONE

L'impianto decorativo - che sviluppa sulla pietra lavorazioni grafiche, linee morbide e geometrie di posa - identifica un preciso stile visivo. Mosaici, varianti e formati speciali danno sostanza e intensità agli ambienti, stabilendo nuove possibilità di relazione tra le superfici del pavimento e le pareti.

PROTECT

La protezione antibatterica avanzata Protect garantisce superfici più salubri e protette. Grazie a questa innovativa tecnologia, gli ambienti diventano più igienici e sicuri, assicurando una tranquillità extra per chi vive gli spazi.

/ NATURAL ELEGANCE

Inspired by sedimentary limestone, the Intense collection faithfully reproduces the clastic granules and micro-inclusions of fossils that are typical of this stone, lending it an authentic natural feel.

/ FIVE WARM SHADES

The colour palette is made up of five hues that are native to limestone: neutral and enveloping tones that evoke the character of the natural stone, with its warm and intense matrix, to bring an inviting sense of comfort to any environment.

/ MATERIAL SENSATION

Every aspect of Intense is carefully designed to be completely realistic. The synergy between graphics and structure reflects the evolution of the surface over time, revealing, in every cavity, the essence of a beautiful and profoundly tactile stone-look product.

/ FOUR SURFACES

A diverse array of finishes that mimic stone processing techniques, suitable for any application. Intense's limestone-look is matte with visual depth in the Nat version, soft and weathered in Lapp, chiselled and decorative in Trait, and perfect for outdoor use with Grip.

/ NEW SIZE

What sets the collection apart is the wide range of formats, notably the introduction of the new 90x180cm module with a thickness of 9mm. This addition offers exciting new possibilities for compositions and installations, guaranteeing surfaces that are always uniform and architecturally striking.

/ UNLIMITED OUTDOOR POSSIBILITIES

With the anti-slip Grip finish available in the widest range of formats to date, Intense makes it possible for outdoor surfaces to seamlessly match the style of the interiors. Completing the collection is the L2 format, with a thickness of 20mm, for the most demanding applications.

/ DECORATION

The decorative scheme, which incorporates graphic motifs, soft lines, and geometric laying patterns, defines a precise visual style. Mosaics, variations, and special formats give environments substance and intensity, creating new opportunities for relationships between floor and wall surfaces.

/ PROTECT

Protect's advanced antibacterial protection guarantees surfaces that are healthier and more protected. Thanks to this innovative technology, environments become safer and more hygienic, providing occupants with greater peace of mind.

Una varietà di finiture consente ad Intense di adattarsi perfettamente ad ogni esigenza progettuale, dall'interior, all'outdoor, dalla grande architettura al contract.

Naturale. La texture Nat, opaca e materica, esprime al meglio la verosimiglianza con la pietra naturale: attraverso la sapiente lavorazione della materia ceramica, il dialogo tra grafica e struttura si combina perfettamente creando un effetto molto realistico. Integrando la tecnologia Safetouch, la superficie Nat risulta inoltre facile da pulire e mantenere, pur mantenendo un alto coefficiente di resistenza allo scivolamento.

Lappata. La texture Lapp è la più morbida e piacevole al tatto: un'innovativa lavorazione meccanica, preservando la stessa eleganza della pietra originale, ne fa emergere un aspetto vissuto e anticato donando profondità alla materia ceramica.

Grip. La versione Grip, declinazione estetica della naturale ma con superficie antiscivolo, è adatta per l'outdoor: disponibile nei due spessori di 9 e 20mm, è la soluzione più performante in termini di resistenza, durabilità e praticità per gli spazi esterni.

Trait. A completamento delle finiture, Intense propone infine Trait, una texture che richiama la scalpellatura della pietra, una lavorazione irregolare di incisione della materia per un effetto più decorativo di tutte le superfici.

A variety of finishes allows Intense to seamlessly adapt to any design need, whether indoors or outdoors, and from grand architectural projects to large-scale contracts.

Naturale. The Nat texture, matte and satisfyingly tactile, beautifully mimics the natural stone. Through skilful ceramic craftsmanship, the interplay between graphics and structure blends perfectly, creating a very realistic effect. Thanks to the integration of Safetouch technology, the Nat surface is also easy to clean and maintain, while also ensuring a high level of slip resistance.

Lappata. The Lapp texture is softer and more pleasing to the touch. An innovative mechanical processing technique, that preserves the same elegance of the original stone, creates a weathered and aged appearance, giving depth to the ceramic material.

Grip. Grip, aesthetically a version of the natural texture, but with an anti-slip surface suitable for the outdoors, is available in two thicknesses: 9mm and 20mm. It is the highest performance solution in terms of strength, durability, and practicality for external spaces.

Trait. Finally, completing the range of finishes, Intense presents Trait, a texture that recreates the effect of chiselled stone through a processing technique that uses engraving to give the entire surface a more decorative look.

The Trait variation captures the ongoing dialogue between matter and the passage of time. It recalls the processing techniques of natural stone, featuring the scratched and irregular markings of chiseling for a sculptural effect that defines the surface. Trait embraces the journey of the material through time, blending stone's memory with a contemporary aesthetic.

Trait Beige 60x120 nat

Clair and Beige.

Trait, establishing a dialogue between the shades of Clair and Beige, adds a decorative element to the solidity of the stone, bringing elegance and practicality to the bathroom.

Workspaces reinterpreted with a decorative touch. An office with a floor that showcases a geo-metric arrangement with the special Gramma 72 format and walls featuring Plick, a new variation that incorporates both the weathered look of stone and the organic forms of nature. Available in two colours, Gris and Mou, Plick serves as a simple yet understated decorative element that adds a dynamic touch to walls thanks to the reflection of light, intensified by the lapped finish of the surface.

One of the materials most prized by designers due to its technical and aesthetic qualities, porcelain stoneware is the preferred choice for creating continuity between the indoor and outdoor surfaces of a space. From this point of view, Intense offers a wide variety of formats in the traditional thickness of 9mm. In the L2 version (20mm), the anti-slip Grip finish ensures durability, safety, and maximum resistance to weather conditions.
