

Basaltina®

From the heart of Italy to the world

venture

THE COMPANY

Basaltina S.r.l. is the exclusive quarry owner and worldwide supplier of Basaltina® natural stone for distribution and architectural projects.

Our experience in the stone world will help you design a cost effective, functional and cutting-edge project.

THE STONE

Known since the Ancient Romans with the name «Pietra Aniciana», Basaltina® was used to build roads and monuments that still exist.

Nowadays, the stone is appreciated worldwide and considered one of the benchmarks of Made in Italy

«Sunt vero item lapidicinae complures in finibus Tarquiniensium, quae dicuntur Anicianae [...] haec autem habent infinitas virtutes. Neque enim is gelicidiorum tempestas neque ignis tactus potest nocere»

“There are many quarries on the borders of the Tarquinienses, called the Anician quarries [...] This stone has numberless good qualities; neither frost nor fire affects it. It is hard and durable”

Vitruvio in De Architectura . II, 7.4 – the first and most important treatise on architecture as a guide for building projects.

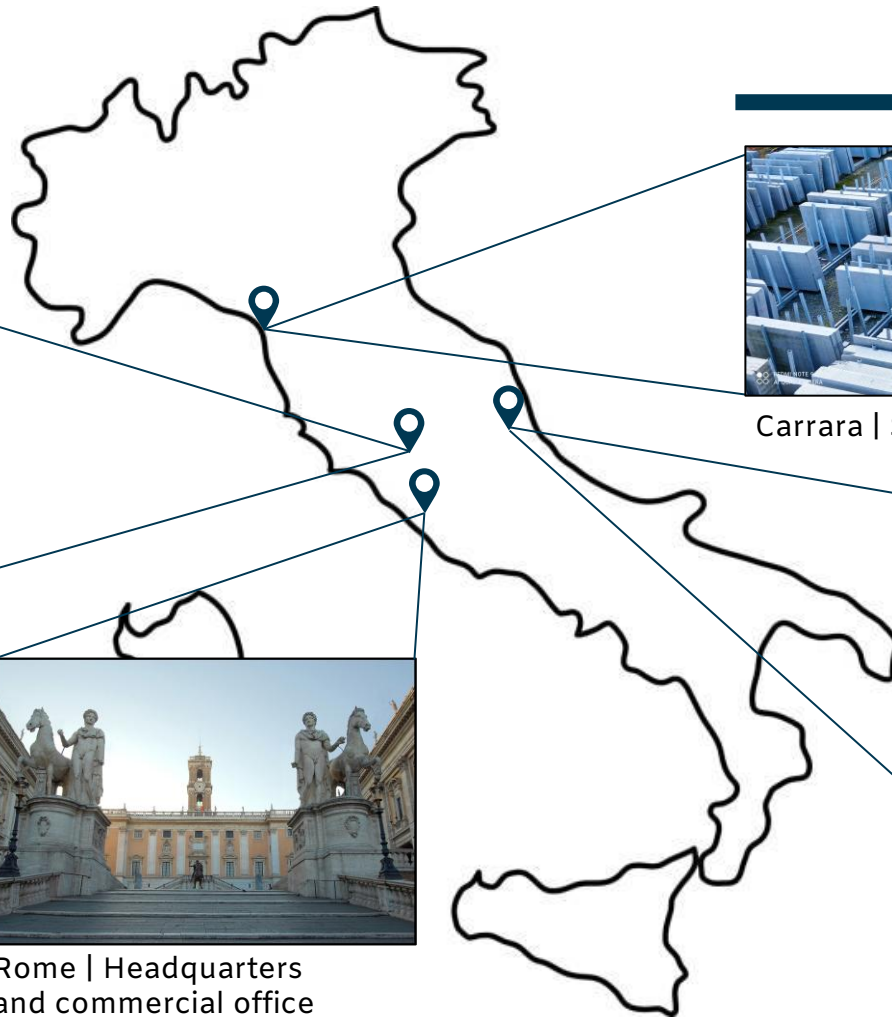

THE QUARRY

Basaltina® quarry is one of the biggest basalt quarries in Europe, employing more than experienced 60 workers and modern machinery, matching the highest production and sustainability standards

LOCATIONS

Carrara | Slabs factory and Warehouse

Bagnoregio | Quarry, Warehouse, Showroom and Factory
